***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,3,7 are finally rejected under 35 U.S.C. 102(b) as being anticipated by Kessler et al. (US 6,119,864). Kessler discloses a tubular body 17 with arch openings 27 for engaging two flexible prongs 42 on the plug-in body in Figure 1. A hole 30 is formed on the plug-in-body. A holding pocket 41 is formed on the mounting plate portion 41. Similarly, Figures 2A-8B show an alternative embodiment wherein a tubular body 120 with apertures 128 engages the prongs 124,126 of the plug-in-body.

Applicant's comment with regard to Kessler is not understood. Kessler clearly shows a pocket 41 or pocket portions 116, 140,142, 144, 146 that is sized to hold a small article, in this case, a battery. The amendment has not overcome the prior art of record.

3. Claims 1,3 are rejected under 35 U.S.C. 102(b) as being anticipated by Danielson et al. (US 6,341,710). Danielson et al. discloses a tubular body 12 with arch openings 114 for engaging two flexible prongs 48,60,86,88 on the plug-in body. A hole 30 is formed on the plug-in-body. A holding pocket 41 or 84 is formed on the mounting plate portion. Similar to Kessler et al., Danielson et al. provide the holding pocket that is capable of holding and storing a small article.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 5 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Kessler et al. or Danielson et al. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the case out of transparent synthetic resin material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

6. Claim 4 is finally rejected under 35 U.S.C. 103(a) as being unpatentable over Kessler et al. or Danielson et al. in view of Official Notice. Official Notice is taken of the conventional use of a protrusion and recess in a top and bottom portions, respectively, of a case or container to ensure the two portions engage each other in a closed position. It would therefore be obvious in view of Official Notice to provide this type of engagement to prevent inadvertent separation.

7. Claim 7 is finally rejected under 35 U.S.C. 103(a) as being unpatentable over Danielson in view of Krock or Kessler et al. Krock or Kessler et al. teaches an aperture on a case to allow the engagement of a strap or a ring for attachment purpose to another object. It would have been obvious to make this modification in view of Krock or Kessler et al. to attach the case to another object.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners, M.P.E.P. 203.08. **The Group clerical receptionist number is (703) 308-1148 or the Tech Center 3700 Customer Service Center number is (703) 306-5648.**

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers should be directed to Donna Monroe at (703) 308-2209.

For applicant's convenience, the Group Technological Center FAX number is (703) 872-9302 and for After Final Amendment the number is (703) 872-9303. This practice may be used
